Affordable Business Model

When looking to outsource your project, we provide flexible engagement models fitting your objectives, including a team working delicately with you on every step of the way, from initial contact to final delivery.

Flexible Business Models

[Globalisation](#) increases the speed of change. The [top most](#) thrust areas in the business relationship are adhering to a flexible business model. The traditional business models are no more applicable to the [present](#) working environment. An engagement model should cater well to the needs of both the [client](#) and the

development company. We recommend only the right business model to the client. The client can choose from the below-mentioned engagement models or a mix of these:

61

Fixed Price Model

When it is difficult to specify the scope and specification for the development of a project, fixed price model is the most attractive option. Under this business model, detailed prices and timelines are agreed upon in advance, based on a fixed cost for the project.

- When you don't have the requirements, Our qualified business analyst will help you get them.
- Our analysts will generate a detailed Business Requirement Document(BRD). This document includes the project specifications, a wireframe and a more in-depth description of how the system will work.
- Once the BDR is finalised, We will send a time frame and cost estimate.
- Client will review it and if they have any changes, they revert to us. The process continues till the client is satisfied.
- Project Release is not the end. We provide post-delivery services prior and after release, as desired by the client.
- We have an excellent quality assurance program, so the development of your project is always done smoothly and with professional quality.
- After a project is complete, testing and training is carried out at the client's site, if necessary.

Time and Material

62

When it is difficult to specify the scope, specification and implementation for the development of a project, time and material engagement model is the most attractive option. Under this business model, all the activities are monitored on

the hourly²⁵ basis. And the client¹¹ is charged according to the predefined hourly rate.

- The Client¹¹ pays in advance for the hour slots, and these can be of their choice.
- Discussion about requirements and specifications is not a high priority as all this can be decided²⁶ at any level of project development.
- Client²⁷ can make use of the purchased hours on the agreed project up to certain time duration^{28,29}.
- Client is updated³⁰ with fair³¹ hour log, quick turnaround³².
- This model is value for money.

64 Hire Dedicated Resource/Team

With this model, you can access a pool of multi-disciplinary and professional resources that are organized³³ and managed by Aroham Technologies. These resources are employed³⁴ in such a way that they meet the business objectives of our clients. This business model is usually used³⁵ for the projects³⁶ of long-term³⁷ partnership³⁸ with a significant amount of work.

- Access wide³⁹ range of qualified designers and experts developers.
- Customized⁸ IT infrastructure to meet your business needs.
- Instant start-up⁴⁰ of the project with minimum discussion time
- Instant updates for every step of development and design
- Transparent working and reporting on the progress of the project

67 Our commitment to you

- Innovative, cost effective⁴¹ & customized⁸ quality services
- Thorough understanding of client's^{2,11} requirements to ensure 100% satisfaction
- Using technology⁴² of high class and of cutting edge

- Passionate, reliable and trusted
- Faster TAT
- 24 x 7 we serve with a smile

Our Expertise

- [Android Development Expertise](#)
- [Magento Development Expertise](#)
- [Wordpress⁴³ Development Expertise](#)
- [Drupal Development Expertise](#)
